Education

Johns Hopkins University

August 2025

Master of Science in Regulatory Science & Quality Assurance

Baltimore, MD

- **Relevant Coursework:** Clinical Drug Development & Trial Management, Biopharmaceutical Regulatory Strategy, GCP & cGMP Compliance, Risk Assessment & Management

University of Illinois at Urbana-Champaign

May 2022

Bachelor of Science in Bioengineering

Champaign, IL

- **Relevant Coursework:** Clinical Trial & Experiment Design, Regulation in Biotechnology, Surgical Device Technologies, Biomedical Data Science

Experience

Diablo Clinical Research - Flourish Research

June 2025 – Present

Quality Control & Data Management Specialist

Walnut Creek, CA

- Interpret clinical protocols, sponsor guidance, and various clinical site standard operating procedures across phase I-IV clinical trials in endocrinology, cardiology, vaccine, and device studies - translate protocol requirements into actionable documentation for investigators and coordinators
- Verify and provide oversight on clinical event outcomes encompassing clinical trial timelines, including but not limited to AE/SAE documentation, subject medical history, laboratory test results, and investigational product dosing
- Perform source data verification (SDV), reconciling source records against electronic data capture (EDC) documentation - resolve sponsor and CRA queries in writing with concise, evidence-based resolutions ahead of monitoring audits
- Oversee compliance for informed consent documentation, investigational medicinal product (IMP) handling/reconciliation, and other protocol-required procedures in accordance with ICH-GCP, IRB requirements, and FDA regulations - identify and escalate inconsistencies prior to sponsor review and submission
- Support document control within site trial master files in line with ALCOA and good documentation practices, keeping in line with site operating procedure of audit readiness
- Collaborate cross-functionally with clinical research coordinators, regulatory specialists, study monitors/CRAs, and executive leadership through document review cycles, query resolution, and corrective action follow-up

Aetna & CVS Health

November 2022 – June 2025

Certified Pharmacy Technician – Outpatient Quality & Inventory Management

Pleasanton, CA

- Prepared and submitted adverse drug reaction and event reports to regulatory agencies, summarizing product details, patient exposures, and clinical outcomes in support of pharmacovigilance and patient safety
- Documented cGMP and GCP adherence across pharmaceutical drug and device packaging and verification, maintaining prescription, medication, and patient records suitable for internal quality audits
- Applied FDA, DEA, and HIPAA compliance requirements governing daily pharmacological operations through routine audits of pharmaceutical inventory, prescription management, and document control practices governed by California State Board of Pharmacy policy

Katz Diagnostics

August 2021 – Dec 2021

Research & Development Engineer

Chicago, IL

- Researched and established the competitive landscape of finding a non-invasive approach to diagnosis of fibromyalgia, in preparation for designing solution using existing technologies in bioengineering research
- Evaluated development against ISO 14971, 13485, and FDA design control requirements, translating standards into documentation deliverables for prototype and testing phases

Technical Skills

Technical: Python, R, SQL, Microsoft Office, Veeva CDMS, Medidata RAVE, Oracle InForm, Clinical Trial Management Systems (CTMS), CPT Diagnosis Coding

Concepts: Quality Assurance & Control, Patient & Drug Safety, Regulatory Requirements, Clinical Trial Management, Source Data Verification, Document Control, Inventory Management, Root Cause Analysis, Mass Spectroscopy, Flow Cytometry, Biomarkers, ISO 13485/14971, 21 C.F.R. Parts 11, 50, 56, 210, 211, 312, 600, 812, 820
