Informed Consent Form

Oncternal Therapeutics

Title of Project: A Phase 1/2 Study of ONCT-354 In Subjects with Metastatic Castration-Resistant Prostate Cancer

Principal Investigator: Robert Investigator, MD

Other Investigators:

Participant ID: _____

Clinical Study Site: XYZ Clinical Research

Introduction:

We formally invite you to participate in a research study conducted by Oncternal Therapeutics: A Phase 1/2 Study of ONCT-534 in Subjects with Metastatic Castration-Resistant Prostate Cancer. This study aims to identify an effective treatment to advanced forms of prostate cancer that are highly resistant to metastatic castration therapies such as androgen deprivation therapy (ADT). Participation in this study is entirely voluntary, and we strongly recommend you discuss any further questions you may have about the study, condition, or the institution with our staff members. Please take your time with this decision, and if you are willing to participate, please sign this form.

Approximately 27 people are expected to take part in this research study for Phase I. The study will move to a two-dose level design for Phase 2, with an estimated 16 participants per dose for a total of 32 participants expected for Phase 2.

Should you decide to take part in this study, your participation is expected to last approximately 108 weeks (~2 years).

Section 1. Purpose of the Research

The purpose of this research study is to obtain information on the safety and effectiveness of ONCT-534, an investigational drug developed by Oncternal Therapeutics to treat participants with metastatic castration-resistant prostate cancer.

You are being offered the opportunity to take part in this research study based on your diagnosis of prostate cancer, with indications of previous treatment plans not being effective.

Section 2. Procedures

As stated above in the Introduction, this study and all related procedures within this study are expected to take 108 weeks, for both Phase I (Dose Escalation) and Phase II (Dose Expansion). Multiple visits will be taking place throughout the course of this study, on a monthly basis, during which several assessments will be conducted to evaluate medical response and vital signs:

- Physical examination
- Weight & vital signs

- 12-lead Electrocardiogram (ECG)
- Clinical chemistry
- Prostate-specific antigen
- Clinical hematology & coagulation
- Urinalysis
- **In-clinic administration of ONCT-534**
- Blood samples for pharmacokinetics and biomarkers
- CT scans (chest/abdomen and pelvis)
- Bone scans
- Evaluation of adverse events & concomitant medications/therapies
- Tumor biopsy (optional)

Section 3. Time Duration of the Procedures and Study

Both the Dose Escalation (Phase I) and Dose Expansion (Phase II) segments of this study are expected to last approximately two years. Meaning, should you choose to participate in this study, please expect to be in treatment with the investigational drug and participate in our clinical practices for about 108 weeks. Following pre-screening and introductory visits (to administer first doses of ONCT-534), you will be asked to return to the clinic every month for routine visits and vital monitoring checks.

Section 4. Discomforts and Risks

By participating in this study, you agree that you will not receive the results of any tests, assessments, or exams that you undergo throughout the study.

While on this study, you may be at risk for side effects from the investigational drug ONCT-534. They may vary from person-to-person, and should they occur, drugs will be given to make them less serious and uncomfortable. You may choose not to participate in this study due to the potential risks outlined below:

- Risk of liver and kidney toxicity in patients with renal or hepatic impairment.
- Risk of seizures in patients with central nervous system (CNS) metastases or history of seizures.

Section 5. Potential Benefits

A potential benefit you may experience from participation in this study is increased resistance to androgen receptor signaling inhibitors (ARSIs) within 1 to 2 years of treatment initiation. This increased resistance could be a result of several occurrences, including AR gene amplification, mutations in the ligand binding domain, and expression of AR splice variants that lack part or all of the ligand binding domain.

The results of this study can guide future phases of the investigational drug's performance in terms of improving the drug's efficacy.

Section 6. Statement of Confidentiality

A description of this clinical trial will be available on <http://www.clinicaltrials.gov>, as required by U.S. law. This website will not include information that can identify you. At most, the website will include a summary of the results. You can search the website at any time.

Your research records that are reviewed, stored, and analyzed at our clinical facility will be kept in a secured area on-site, available primarily to the principal investigator. Alongside your records, any samples collected during the course of this study will be appropriately labeled with a subject number (your identifier) and stored in our laboratory securely. For our clinical facility's reference alone, your initials will also be placed on the sample labels and records.

In the event of any publication or presentation resulting from the research, no personally identifiable information will be shared.

We will keep your participation in this research study confidential to the extent permitted by law. However, it is possible that other people may become aware of your participation in this study. For example, the following people or groups may inspect and copy records pertaining to this study:

- The U.S. Food and Drug Administration and the Office of Human Research Protections, both entities of the U.S. Department of Health & Human Services
- The Oncternal Therapeutics Institutional Review Board (a committee that reviews and approves research studies)
- The Oncternal Therapeutics Human Subjects Protection Office
- The National Institute on Aging, the funding agency, and its authorized representatives.

Some records will contain information that personally identifies you. Reasonable efforts will be made to keep your personal information on these records private and confidential, however absolute confidentiality cannot be guaranteed.

Section 7. Costs for Participation

If complications or injuries occur that are the result of a medication, procedure, or test required for this research study, Oncternal Therapeutics will reimburse the standard charges for the treatment of these complications and/or injuries. The compensation described in this section will be the only form of compensation provided to you for complications or injuries related to this study.

You will not lose any legal rights by signing this form.

Section 8. Compensation for Participation

You will not receive any compensation for participation in this research study.

Section 9. Research Funding

The institution and investigators are receiving grants from the National Cancer Institute and the University of Tennessee Research Foundation to support this research.

Section 10. Voluntary Participation

Taking part in this research study is voluntary. If you choose to take part in this research, your major responsibilities will include adherence to the investigational drug and its dosing schedule. You do not have to participate in this research. If you choose to take part, you have the right to stop at any time. If you decide not to participate or if you decide to stop taking part in the research at a later date, there will be no penalty or loss of benefits to which you are otherwise entitled.

If you will be participating in another clinical trial at XYZ Clinical Research or elsewhere while in this research, you should discuss the procedures and/or treatments with your physician or the investigators. This precaution is intended to protect you from possible side effects from interactions of research drugs, treatments or testing.

During the course of the research you will be provided with any significant new findings that may affect your willingness to continue participating in this research.

Section 11. Contact Information for Questions or Concerns

You have the right to ask any questions you may have about this research. If you have questions, complaints or concerns or believe you may have developed an injury related to this research, contact Robert Investigator, MD at 123-456-7890 or the doctor on 24-hour call at 987-654-3210.

If you have questions regarding your rights as a research participant or you have concerns or general questions about the research, or about your privacy and the use of your personal health information, contact the research subjects protection advocate in the XYZ Clinical Research Protection Office. You may also contact them if you cannot reach the research team or wish to talk to someone else.

For more information about participation in a research study and about the Institutional Review Board (IRB), a group of people who review the research to protect your rights, please visit the XYZ Clinical Research's IRB web site. Included on this web site, under the heading "Participant Info", you can access federal regulations and information about the protection of human research participants. If you do not have access to the internet, copies of these federal regulations are available by contacting XYS Clinical Research.

Signature and Consent/Permission to be in the Research

Before making the decision regarding enrollment in this research you should have:

- Discussed this study with an investigator,
- Reviewed the information in this form, and
- Had the opportunity to ask any questions you may have.

Your signature below means that you have received this information, have asked the questions you currently have about the research and those questions have been answered. You will receive a copy of the signed and dated form to keep for future reference.

Participant: By signing this consent form, you indicate that you are voluntarily choosing to take part in this research.

<u>[Signature of participant]</u>	<u>[date]</u>	<u>[time]</u>	<u>[print name]</u>
-----------------------------------	---------------	---------------	---------------------

Signature of Participant	Date	Time	Printed Name
--------------------------	------	------	--------------

Participant's Legally Authorized Representative: By signing below, you indicate that you give permission for the participant to take part in this research.

<u>[Signature of participant]</u>	<u>[date]</u>	<u>[time]</u>	<u>[print name]</u>
-----------------------------------	---------------	---------------	---------------------

Signature of Participant's Legally Authorized Representative	Date	Time	Printed Name
---	------	------	--------------

(Signature of Participant's Legally Authorized Representative is required for people unable to give consent for themselves.)

Description of the Legally Authorized Representative's Authority to Act for Participant:

[Description of the authority]

Person Explaining the Research: Your signature below means that you have explained the research to the participant/participant representative and have answered any questions he/she has about the research.

<u>[Signature of participant]</u>	<u>[date]</u>	<u>[time]</u>	<u>[print name]</u>
-----------------------------------	---------------	---------------	---------------------

Signature of person who explained this research	Date	Time	Printed Name
--	------	------	--------------

Only approved investigators for this research may explain the research and obtain informed consent.

A witness or witness/translator is required when the participant cannot read the consent document, and it was read or translated.

<i>INSTRUCTIONS: The following applies to optional parts of the research only, e.g., storage of leftover tissue for future research, optional sub-studies, etc.</i>

In addition to the main part of the research study, there is an optional part of the research. You can participate in the main part of the research without agreeing to take part in this optional part.

(For research involving optional storage of tissue for future research) Optional Tissue Storage for Future Use

As part of this study, we are obtaining (*tissue and/or blood and/or cells*) from you. If you agree, the (*researchers*) would like to store leftover sample(s) of your (*tissue and/or blood and/or cells*) so that your (*tissue and/or blood and/or cells*) can be studied in the future after this study is over. (*Add the following statement if storage is optional*) These future studies may provide additional information that will be helpful in understanding [disease/condition], but it is unlikely that these studies will have a direct benefit to you. The results of these tests will not have an effect on your care. Neither the investigator nor you will receive results of these future research tests, nor will the results be put in your health record. Sometimes tissue is used for genetic research about diseases that are passed on in families. Even if your sample(s) (*is/are*) used for this kind of research, the results will not be put in your health records. It is possible that your (*tissue and/or blood and/or cells*) might be used to develop products or tests that could be patented and licensed. There are no plans to provide financial compensation to you should this occur. If you have any questions, you should contact (*PI name*) at (*phone number*).

(For linked samples) Your leftover samples will be labeled with (*list all that apply: “a code number”, “your initials”, etc.*). These samples will be stored (*describe how the samples will be secured: “Dr. (PI’s name)’s locked laboratory*) at (*sample location*). If you consent to the collection of samples of your (*source of sample*) (*e.g., blood, tissue, bone marrow*) for future research, the period for the use of the samples is unknown. If you agree to allow your (*tissue and/or blood and/or cells*) to be kept for future research, you will be free to change your mind at any time. You should contact (*PI name*) at (*phone number*) and let (*him/her*) know you wish to withdraw your permission for your (*tissue and/or blood and/or cells*) to be used for future research. Any unused (*tissue and/or blood and/or cells*) will be destroyed and not used for future research studies.

(For unlinked samples) Your samples will not be labeled with any of your personal information, such as your name or a code number. Once you give your permission to have your leftover samples stored, they will be available for use in future research studies indefinitely and cannot be removed due to the inability to identify them.

(Add the following tissue options or variations if storage is optional) You should initial below to indicate your preferences regarding the optional storage of your leftover (*tissue and/or blood and/or cells*) for future research studies.

- a. Your sample(s) may be stored and used for future research studies to learn about, prevent, treat or cure (*disease/condition*).

_____ Yes _____ No

- b. Your sample[s] may be stored and used for research about other health problems.

_____ Yes _____ No

- c. Your sample(s) may be shared with other investigator/groups without any identifying information.

_____ Yes _____ No

Participant: By signing below, you indicate that you have read the information written above and have indicated your choices for the optional part of the research study.

<u>[Signature of participant]</u>	<u>[date]</u>	<u>[time]</u>	<u>[print name]</u>
Signature of Participant	Date	Time	Printed Name

Participant's Legally Authorized Representative: By signing below, you indicate that you have read the information written above and have indicated your choices for the optional part of the research study.

<u>[Signature of participant]</u>	<u>[date]</u>	<u>[time]</u>	<u>[print name]</u>
Signature of Participant's Legally Authorized Representative	Date	Time	Printed Name

(Signature of Participant's Legally Authorized Representative is required for people unable to give consent for themselves.)

Description of the Legally Authorized Representative's Authority to Act for Participant:

[Description of the authority]

Person Explaining the Research: Your signature below means that you have explained the optional part of the research to the participant/participant representative and have answered any questions he/she has about the research.

<u>[Signature of participant]</u>	<u>[date]</u>	<u>[time]</u>	<u>[print name]</u>
Signature of person who explained this research	Date	Time	Printed Name

SAMPLE HIPAA AUTHORIZATION LANGUAGE

Authorization to Use or Disclose (Release) Health Information that Identifies You for the Research Study

REQUIRED ELEMENTS:

If you sign this document, you give permission to the study doctor and research team at [Study Institution] to use or disclose (release) your health information that identifies you for the research study.

The health information that we may use or disclose (release) for this research includes:

- Name
- Address
- Phone number
- Date of birth
- Medical history
- Data collected during your participation in study visits, including all test results
- *[Customize based on the information to be used or disclosed for the research study]*

The health information listed above may be used by and/or disclosed (released) to the following authorized users:

- Representatives of The National Institute on Aging, the funding agency, and its authorized representatives
- Representatives of *[CRO name]*.
- Representatives of *[IRB name]* (an Institutional Review Board that reviews this study).
- The Food and Drug Administration (FDA and other US federal and state agencies.
- Government agencies to whom certain diseases (like HIV, hepatitis, and STDs) must be reported.
- Governmental agencies of other countries.
- Outside individuals and companies, such as laboratories and data storage companies, that work with the researchers and need to access your information to conduct this study.
- Other research doctors and medical centers participating in this research, if applicable.
- A data safety monitoring board which oversees this research, if applicable.
- *[Customize based on the design of the research study]*

Once your health data has been shared with authorized users, it may no longer be protected by federal privacy law and could possibly be used or disclosed in ways other than those listed here.

Please note that:

- You do not have to sign this Authorization, but if you do not, you may not receive research-related treatment.
You may change your mind and revoke (take back) this Authorization at any time. Even

if you revoke this Authorization, the study team may still use or disclose health information they already have obtained about you as necessary to maintain the integrity or reliability of the current research. To revoke this Authorization, you must write to: [name of the Study PI) and contact information].

This Authorization does not have an expiration date [or as appropriate, insert expiration date or event, such as "end of the research study."]

Signature of participant or participant's personal representative

Date

Printed name of participant or participant's personal representative

If applicable, a description of the personal representative's authority to sign for the participant

OPTIONAL ELEMENTS:

Examples of optional elements that may be relevant to the recipient of the protected health information:

- Your health information will be used or disclosed when required by law.
- Your health information may be shared with a public health authority that is authorized by law to collect or receive such information for the purpose of preventing or controlling disease, injury, or disability, and conducting public health surveillance, investigations or interventions.
- No publication or public presentation about the research described above will reveal your identity without another authorization from you.
- If all information that does or can identify you is removed from your health information, the remaining information will no longer be subject to this authorization and may be used or disclosed for other purposes.
- **When the research for which the use or disclosure is made involves treatment and is conducted by a covered entity:** To maintain the integrity of this research study, you generally will not have access to your personal health information related to this research until the study is complete. At the conclusion of the research and at your request, you generally will have access to your health information that [name of the covered entity] maintains in a designated record set, which means a set of data that includes medical information or billing records used in whole or in part by your doctors or other health care providers at [name of the covered entity] to make decisions about individuals. Access to your health information in a designated record set is described in the Notice of Privacy Practices provided to you by [name of covered entity]. If it is necessary for your care, your health information will be provided to you or your physician.
- If you revoke this Authorization, you may no longer be allowed to participate in the research described in this Authorization.
